The Airbus A220, A320, A350, & A380

The center of gravity (CG) of an aircraft is the point over which the aircraft would balance. Its position is calculated after supporting the aircraft on at least two sets of weighing scales or load cells and noting the weight shown on each set of scales or load cells. The center of gravity affects the stability of the aircraft. To ensure the aircraft is safe to fly, the center of gravity must ...

Center of gravity of an aircraft - Wikipedia

number is composed of the general 747 operations manual number, D6-30151-, and is followed by the manual-specific extension. The page date is the date of publication of the manual or the most
