Irrational Exuberance Definition - investopedia.com

Irrational exuberance is a state of mania. In the stock market, it's when investors are so confident that the price of an asset will keep going up, they lose sight of its underlying value. The phrase was coined by former Federal Reserve Chairman Alan Greenspan in 1996. It's also a book by Robert Shiller describing the 2000 stock market bubble.

Irrational Exuberance: Definition, Quote, Book, Examples

The original and bestselling 2000 edition of Irrational Exuberance evoked Alan Greenspan's infamous 1996 use of that phrase to explain the alternately soaring and declining stock market. It predicted the collapse of the tech stock bubble through an analysis of the structural, cultural, and psychological factors behind levels of price growth not reflected in any other sector of the economy.

Irrational Exuberance

The term "irrational exuberance" was first used by Alan Greenspan in 1996 when he perhaps perceived a bubble building up in the stock market. He did precious little to either elaborate this concept or take any step to prevent bubble from bursting as it eventually did at the turn of the century.

Irrational Exuberance by Robert J. Shiller

According to Yale's Robert J. Shiller, author of the book *Irrational Exuberance*, which expands on the theme of Greenspan's comments, the term is now used to describe "a heightened state of speculative fervor." Why Does Irrational Exuberance Matter? This term is more famous for its impact rather than for its definition.

Irrational Exuberance Definition & Example | InvestingAnswers

In this revised, updated, and expanded edition of his New York Times bestseller, Nobel Prize-winning economist Robert Shiller, who warned of both the tech and housing bubbles, cautions that signs of irrational exuberance among investors have only increased since the 2008-9 financial crisis. With high stock and bond prices and the rising cost of housing, the post-subprime boom may well turn out to be another illustration of Shiller's influential argument that psychologically driven ...

Irrational Exuberance 3rd edition: Shiller, Robert J ...

Irrational Exuberance is a March 2000 book written by American economist Robert J. Shiller, a Yale University professor and 2013 Nobel Prize winner. The book examines economic bubbles in the 1990s and early 2000s, and is named after Federal Reserve Chairman Alan Greenspan's famed "irrational exuberance" quote warning of such a possible bubble in 1996.
