In the canonical compartmentalization of linguistics, lexicography belongs to applied linguistics. Its theoretical counterpart is lexicology, and specifically with regard to the description of meaning, lexical semantics. But lexicography is not always a direct application of a lexicological or a semantic theory, and to the extent that lexical semantic theory has actually played a role, the plurality of theories of word meaning needs to be taken into account.

Theories of Lexical Semantics: A Cognitive Perspective ...

Lexical semantics is the study of word meaning. Two issues of demarcation are relevant in this respect. First, although the definition of lexical semantics may suggest otherwise, morphological semantics (the study of the meaning of complex words as a function of the meaning of their parts and the way they are constructed) is usually considered a separate field from lexical semantics proper.
