the current scientific understanding of synesthesia, a perceptual condition where an experience of one sense causes an automatic and involuntary experience in another sense. The afterword is written by Dimitri Nabokov, a synesthete, and the son of the well-known author and synesthete Vladimir Nabokov.

Discovering The
Brain Of
Synesthesia

In Wednesday Is Indigo Blue, Richard Cytowic and distinguished neuroscientist David Eagleman explain the neuroscience and genetics behind synesthesia's multisensory experiences. They show that perception is already multisensory in everybody, though for most of us its multiple dimensions are beyond the reach of consciousness.
